

## U.S. Government Services Facility Chicago, Illinois

### HydroPlex Installation

#### **OVERVIEW:**

The Government's objective for its cooling tower and chiller maintenance was to control scale and biological contamination without the use of chemicals.

#### **ACCOMPLISHMENTS:**

After installation of The HydroPlex™ all chemical treatment was discontinued. Algae and other biological matter no longer emerged, and the tower and chiller remained scale free. The tower basin was debris free, thus eliminating customary and hazardous labor for debris removal.
